

# Lighter, Stronger, Easier & Safer to Use...

Magswitch introduces the world's first cordless electric heavy lifter!

This lifter is ideal for transporting steel in hard to reach places such as narrow beams where manual ON/OFF lifters are hard to turn on, or places where using a manual lifter are unsafe such as steel located high up on racks or steel sheet being placed on a cutting or burn table. The Magswitch Cordless Electric (CE) Lifter offers unprecedented convenience and safety for your employees. One operator can work alone and control the lifter from a safer distance.

Large remote helps prevent misplacement.

## Features & Benefits

- Sensor prevents accidental release while under load.
- Warning light flashes on top of unit to give a 3-second warning to when the load is about to release.
- Holds load even if battery loses charge.
- Lifter magnet will not activate unless on a sufficient steel target.
- Intelligent sequencing to prevent accidental off.
- Battery offers up to 750 actuations per charge.
- Manual ON/OFF override feature, if battery loses charge.
- Compact – fits in narrow beams.

Includes two 12-volt rechargeable Lithium-ion batteries and a charger, so you always have a spare charged battery on hand.

Part # 8100387	Max. SWL 3:1 Lift Capacity	600 lbs
	Minimum de-stack thickness	Deep 0.5 in
	Length	9.3 in
	Width	4.1 in
	Height	12.7 in
	Weight	19.4 lbs
