Dailey Supply, Inc.

Steel Containers

Models Available: 32x40x24; 4000LB Cap; 170LBs; 16 Cu Ft 36x48x24; 4000LB Cap; 170LBs; 22 Cu Ft

Standard 4 way entry

Our standard container features formed offset stacking legs. Four-way fork truck entry provides maximum efficiency and versatility. The B-3 model has out-turned corrugations while the 200-FL has in-turned corrugations. The B-3 is available in standard sizes noted in the table and both are available in custom sizes for your specific application.

Many options such as riveted crane lugs are also available. Check with our engineers if you have a special need.

The Brute

The true heavy weight of our product line. The brute offers rugged, extraheavy-duty construction for castings, forgings, stampings and other hot or heavy parts. Higher stacking capability allows for greater floor space utilization with added safety.

Steel Containers

33X48X24; 6000LB Cap; 340LBs; 20 Cu Ft

Drop bottom containers offer a fast, efficient and safe way to move and place parts for assembly and many other types of operations. Using one of our custom-designed workstations, parts are discharged through the bottom of the container and placed at the fingertips of your operator. With a lift truck mast attachment, the drop bottom container can be used without a stand enabling, easy discharge of the contents.

Several standard sizes are available and special configurations are available by order. Many options are available including in-turned or out-turned corrugations and reinforced seams.

The Flomatic ® gravity-feed steel container is ideal for handling in and out of process parts. There are no protruding corners, chanels or lugs to make lift truck handling difficult. Formed offset stacking legs permit stackability and four way entry.

Matching workstands have a generous box holding area enabling quick spotting of containers. Many options are available including those pictured below.

Continuous, solid welded seams and joints, capped legs and capped door angle options minimize the possibility of cross-contamination of fasteners between containers. Our container design eliminates hiding places for stray parts.

Models Available:

33x36x18; 4000LB Cap; 190LBs; 11 Cu Ft 33x48x24; 5000LB Cap; 272LBs; 20 Cu Ft
