fall protection
2016-2017

IMPORTANT: The ABC's

Personal fall arrest systems are comprised of three key components. These components must be used together to provide protection from a fall, and are often referred to as the ABC's of fall protection. The ABC's are listed below, and visually shown on page 3.

- (A) Anchorage/Anchor Connector** - anchorages are a secure point of attachment to a structure. Anchorages and Anchor Connectors can vary widely by industry, type of work performed, installation environment, and surrounding structure(s).
- (B) Body Support** - Full Body Harnesses distribute fall arrest forces over the upper thighs, chest, and shoulders. A full body harness will have a connection point for the worker to be properly attached.
- (C) Connecting Device** - Connecting Devices join the Body Support to the Anchorage/Anchor Connector. Connecting devices can be shock absorbing lanyards or retractable lifelines.

How to Calculate Your

FALL DISTANCE

This Diagram explains how to calculate your Fall Distance Clearances, utilizing a standard 6' Shock Absorbing Lanyard

If you are unsure about any of the calculations in this diagram, or you remain uncertain on how to safely protect yourself while working at heights, please contact us immediately.

Only trained, competent workers are permitted to work at heights and utilize fall protection equipment. If you need further training, please contact us immediately.

Please read ALL instruction manuals, and follow ALL directions for the proper use of equipment. Always fully understand how to use and inspect the equipment prior to working at heights or in hazardous situations. and ALWAYS have a rescue plan in place.

FCP's fall protection/confined space/rescue training programs provide you and your employees with the timely product and knowledge requirements that they need to be productive, safe and in compliance. We offer a variety of training courses, ranging from strictly classroom discussion courses to courses that involve hands-on training. Training can be done at your facility or ours. With our training, your employees will have the skills and knowledge to be safer and compliant with today's laws & regulations. More info on pages 54-55.

FALL SAFETY EQUIPMENT

harness options

FCP offers many harness options including: webbing color, padding, D-ring placements, and buckle closures. Plus, we can customize your harness to suit any specific needs. Please inquire for further details concerning customizing & custom orders. Stainless Steel adjusters, buckles & rings are also available upon request.

Option A - Shoulder pads (two pieces) 'SuperNIT' technology incorporates a moisture management system with an anti-microbial coating

Option B - Hip D-rings for positioning

Option C - Quick connect bayonet buckle chest strap (chest strap only)

Option D - Shoulder D-rings

Option F - Leg pads (two pieces) 'SuperNIT' technology incorporates a moisture management system with an anti-microbial coating

Option H - Front chest D-ring for positioning

Option P - Removable, washable, retrofit back & shoulder pad (one piece) 'SuperNIT' technology incorporates a moisture management system with an anti-microbial coating

Option 9 - Additional back D-ring with extension strap built into harness

Buckle Options: ① Friction Buckle, ② Mating Buckle, ③ Grommet/Tongue Buckle, ④ super-quick Bayonet Buckle

AVAILABLE WEBBING COLORS:

harness accessories

Numerous accessories are available for FCP's harnesses. If you don't see exactly what you need, please inquire. Stainless Steel adjusters, buckles, and rings are also available.

♦♦ = Quick Ship Item

- ♦♦ **1418** - 18" x 1 3/4" D-ring extension strap with D-ring on one end & locking snap on other end, as shown.
- 1418-LOOP** - 18" x 1 3/4" D-ring extension with choke loop.
- 400R** - Lanyard retainer, 1" web loop with 2" O-ring sewn to harness, as shown.
- 400SB** - Sliding buckle cover/insulator, as shown.
- 400BC** - Flame resistant buckle covers for chest & leg, as shown. (*harness not included*)
- 800PS** - Removable saddle (*page 12*) for comfort, positioning and suspension applications, as on the 850ABT (*page 13*). Must be used in conjunction with a full body harness.
- 854WB** - Replacement tool belt for 800 Series harness.
- VIZ** - Removable/cleanable class II ANSI hi-visibility vest sold separately as an accessory, or added to a harness as an option (*example: 850VIZ*). Ultra-cool mesh vest has zipper front, inside left chest 2-tier 4-division pencil pocket, & lower inside right patch pocket. Secures to harness with 4 velcro attachment points.
- TL3** - Single leg tool lanyard, as shown.
- TL3DL** - Dual leg tool lanyard, as shown.
- ID** - Tracker Series ID chip built into harness webbing. The RFID Tracker chip, along with WorkerScan software enables you to keep digital records for inventory, inspections, OSHA records, and other pertinent information! Step into the technology age! (*More Tracker info on page 19*)
- ID-RETRO** - Tracker Series ID chip built into a retro-fit pack that can be attached to all of your equipment, as shown. Other methods of retrofitting are available, please inquire. (*More Tracker info on page 19*)

U-STEP

U-STEP

U-STEP Installed
& U-STEP deployed

U-step

helps alleviate SUSPENSION TRAUMA

U-STEP - The U-STEP comes complete with two compact, lightweight 'packs' that easily attached to the sides (left & right) of a full body harness. In the event of a fall, a worker can pull the webbing from the 'packs', connect the locking clasps creating an adjustable loop that the suspended worker can step on to alleviate harness pressure, and reduce the risk of suspension trauma. Must be used in conjunction with a full body harness and a complete fall prevention/rescue program. Fits most harness sizes, styles, and brands.

Another tool in combating Suspension Trauma! Also check out the U-RES-Q, Self-Rescue Ladder/ Lanyard (*page 26*).

enter the **NEXT LEVEL**

High-strength Webbing
Certified, synthetic webbing provides UV and chemical resistance. Custom color options are available.

Integral strato-lite Back/Shoulder Pad & Waist Pad
Flame resistant open cell foam with air-mesh fabric for softness, breathability, and moisture control.

D-ring Options
D-rings are zinc plated and powder coated providing high corrosion resistance. Many options are available.

Label Cover
Heavy-duty, abrasion resistant velcro label cover protects label information.

High-strength Stitching
High-strength, high-contrast stitching for ultra performance and extraordinary visual appeal.

Buckle Options
Buckles are zinc plated and powder coated black providing extended corrosion resistance. Many buckle options are available. Please see part numbers and descriptions.

Lanyard Retainers & Webbing Keepers
Thermo-formed retainers and keepers on both sides of the chest straps.

D-ring Options
D-rings are zinc plated and powder coated black, providing extended corrosion resistance. Many D-ring options are available. Please see part numbers and descriptions.

Integral strato-lite Comfort Leg Pads
Flame resistant open cell foam with air-mesh fabric for softness, breathability, and moisture control.

Subpelvic Strap
Additional rear strap provides extra comfort & security.

Integral strato-lite Comfort Leg Pads
Flame resistant open cell foam with air-mesh fabric for softness, breathability, and moisture control.

6 Point Adjustment
Provides perfect fit & comfort.

OPTIONS for the STRATOS Harness:

- Option B - hip D-rings for positioning
- Option D - shoulder D-rings
- Option 9 - additional back D-ring with extension strap built into harness
- Option H - chest D-ring
- Option ID - TRACKER chip, provides permanent RFID identification
- Option U-STEP - suspension trauma straps

All models come standard in Green/Black

in fall protection

The innovative STRATOS Series of full body harnesses exceed expectations at the highest level. Designed with safety, durability, and maximum comfort as the finished product, the FrenchCreek STRATOS Series hit the mark. All STRATOS Series harnesses come complete with strato-lite comfort shoulder/back pad and leg pads permanently affixed to keep them in the ideal position. Strato-lite padding is specifically designed with open-celled air-mesh for breathability and moisture control for maximum comfort. Meeting and exceeding OSHA and ANSI standards, this American Made STRATOS Series of harnesses can truly be considered the Professional's Choice.

the NAVIGATOR harness

NAVIGATOR harnesses come standard in BLACK webbing

22030B-BLK -

Constructed of 1 3/4" wide 6000 Lb. webbing, this harness offers maximum comfort for all day use. Buckle connections are fixed so they cannot be taken apart or unthreaded. Wide waist belt with lumbar pad for exceptional support and comfort. Pads on back/shoulder straps provide comfort and support and do not allow webbing to slip off shoulders. Leg pads provide comfort while still allowing adjustability. Rear dorsal attachment point for fall arrest. Front sternum attachment point for connecting to a fall arrest system that limits free fall to 2 feet or less, or for a positioning system. Front waist and side attachment points for positioning. Comes with equipment/gear loops.

Sizes available are xs, s-m, l-xl.

Similar Models:

22070B-BLK - 22030B-BLK with quick-connect bayonet leg straps

STRATOS lanyards

all lanyards come standard in 6' lengths with BLACK webbing and meet performance requirements of ANSI Z359. Other lengths and snap hook combinations are available.

- 6' Pack style energy absorbing lanyard
 - 1" wide webbing
 - Z74 locking snaps each end
- Similar Model: 22454AZ - Same but with Z136 rebar snap (2 1/2") one end

The TRACKER

3RD GENERATION

Worker
Scan

A FULL LINE OF 'TRACKER SERIES' PRODUCTS: HARNESES, LANYARDS, & OTHER RELATED SAFETY EQUIPMENT

FrenchCreek's TRACKER technology, in conjunction with WorkerScan, is designed to simplify and maximize management capabilities for Construction Sites, Manufacturing Plants, Oil Rigs, and any other situation that demands permanent positive identification, tracking, and record keeping! The system will improve your companies ability to keep up-to-date records, compliance assurance, increased productivity, decreased theft, less down time during inspections, and more.

RFID system for tracking:

- ♦ Information ♦ Inventory
- ♦ Inspections ♦ OSHA Records

- No special scanner to buy
- Import module for easy integration
- Data is archived for protection
- Provides a complete documentation of equipment history
- Retro-fit any Harness, Lanyard, or other equipment (even tools) with RFID chips!

more TRACKER Info on pgs 5 & 20

WorkerScan is a flexible tool for documentation and reporting of equipment and other assets. Once an asset is entered into the system, you have the ability to attach and create safety inspection checklists and run through them when renewing the inspection on a piece of equipment. You can assign equipment to workers or to a jobsite, providing accountability.

part #: ID-RETRO

ID-RETRO packs can be attached to any product:

- Your current harness, lanyard, etc.
- Hard-goods such as Anchors, SRL's, Tripods, etc.
- Any other products that meet your tracking criteria

part #: ID

RFID chips are stitched into actual product:

- Harnesses
- Lanyards (as shown)
- Other webbing and soft-goods

FrenchCreek's 3RD GENERATION RFID tracking system assists with information, inventory, inspections, and OSHA record keeping!

lanyard options & accessories

FrenchCreek offers many available options when ordering lanyards: from custom lengths to a wide variety of snap hooks. We also offer the following options/accessories to keep you safe, give you peace of mind, and facilitate all of your on-the-job duties!

Choke-Loop - Two options are available for shock absorbing lanyards to Choke to a harness back D-ring. Please inquire for more information or specific part #'s.

① Pack-style with looped end, as shown.

② Internal shock absorber with looped end, as shown.

353 - Shock absorber with D-ring one end, snap on the the other end, as shown.

DT - All 'pack-style' lanyards can be made for extended free-fall by adding DT to the end of the part #.

EXT - Additional D-ring added to the lanyard providing a secondary in-line attachment point for an SRL or other connecting device, as shown. Add 'EXT' to any lanyard part #.

R - The U-RES-Q Ladder Pouch can be placed on many lanyards by adding R to the end of the part #. Please inquire for specific possibilities.

R-RETRO - U-RES-Q Pouch containing 16' auto-ejecting ladder. Use in-line with lanyard and anchor point, providing means for self-rescue, or stand on the ladder to relieve harness tension! #74N locking snap on one end, D-ring on the other end. (More info on page 26)

ID - Tracker Series ID chip built into lanyard webbing, as shown. The RFID Tracker chip, along with WorkerScan software enables you to keep digital records for inventory, inspections, OSHA records, and other pertinent information! Step into the technology age! (More Tracker info on page 19)

ID-RETRO - Tracker Series ID chip built into a retro-fit pack that can be attached to all of your equipment, as shown. Other methods of retrofitting are available, please inquire. (More Tracker info on page 19)

shock absorbing lanyards

web pack-style

1" synthetic webbing with pack-style shock pack. See pages 31-32 for snap options. Standard length: 6' Available in other lengths.

♦♦ = Quick Ship Item

- ♦♦ 355A - #74N locking snap at one end, loop on the shock pack end to choke to harness.
- ♦♦ 450A - #74N locking snaps at each end, as shown.
- 457A-135A - #74N locking snap one end, #135A aluminum snap (2 1/2" opening) other end.
- 450AD - #74N locking snaps at each end, and an adjustable D-ring for tying back to lanyard.
- 452A - #74N locking snap one end, #69 snap (1 3/4" opening) other end.
- 452AN - #74N locking snap one end, #69N snap (1 3/4" opening) other end.
- ♦♦ 454A - #74N locking snap one end, #136 snap (2 1/2" opening) other end.
- ♦♦ 490A - Heavy duty 1 3/4" synthetic webbing, #74N locking snaps each end, as shown.
- 490AK - Heat & flame resistant Kevlar® lanyard w/ Kevlar® pack, #74N locking snaps each end. (shown on page 17)

shock absorbing lanyards

adjustable web pack-style

1" synthetic webbing with pack-style shock pack. Adjustable lanyards ordered by the longest length and adjust down to approximately half. See pages 31-32 for snap options. Standard length: 6' Available in other lengths.

- 450AB - #74N locking snaps at each end, as shown.
- 452AB - #69 snap (1 3/4" opening) other end.
- 452ABN - #69N snap (1 3/4" opening) other end.
- 454AB - #74N locking snap one end, #136 snap (2 1/2" opening) other end.
- 457AB-135A - #74N locking snap one end, #135A aluminum snap (2 1/2" opening) other end.

shock absorbing lanyards

elastic pack-style

1 3/16" synthetic webbing. Stretches to minimize tripping and snagging hazards. See pages 31-32 for snap options. Standard length: 6' Available in other lengths. Standard 6' = 4.5' when relaxed. ♦♦ = Quick Ship Item

- ♦♦ 450AS - #74N locking snaps at each end, as shown.
- 457AS-135A - #74N locking snap one end, #135A aluminum snap (2 1/2" opening) other end.
- 452AS - #74N locking snap one end, #69 snap (1 3/4" opening) other end.
- 452ASN - #74N locking snap one end, #69N snap (1 3/4" opening) other end.
- 454AS - #74N locking snap one end, #136 snap (2 1/2" opening) other end, as shown.

snap hook options

Suspension Trauma is a REAL condition that can occur when a worker is suspended, even for a short amount of time. The U-RES-Q can relieve 100% of the harness tension!

THE U-RES-Q

A FULL LINE OF U-RES-Q PRODUCTS, INCLUDING A RETRO-FIT PACK FOR YOUR CURRENT LANYARD - PATENT PENDING

Please inquire for more lanyards offering the U-RES-Q, that may not be shown.

lanyards - U-RES-Q

SELF
RESCUE!

AUTO-
EJECTING
WEB LADDER!

- **R444A** - 6' dual leg (100% tie-off) shock absorbing web lanyard with #74N locking snap one end, #136 snaps (2 1/2" opening), and U-RES-Q pouches (2 total) other two ends.
- **R450A** - 6' shock absorbing web lanyard w/ pack, #74N locking snaps at each end, U-RES-Q built in, as shown.
- **R460A** - 6' tubular shock absorbing web lanyard with #74N locking snaps at each end, U-RES-Q built in, as shown.
- **R460AT** - Same as R460A, with tether connecting U-RES-Q ladder to harness connector.
- **R490A** - 6' x 1 3/4" shock absorbing web lanyard w/ pack, #74N locking snaps at each end, U-RES-Q built in, as shown.
- **R-RETRO** - Retro fit any lanyard with this U-RES-Q pouch, #74 locking snap one end, D-ring other end, as shown. Use in-line with lanyard & anchor point.
- **R-RESC** - U-RES-Q pouch w/ velcro bottom containing a 20' rescue ladder and #63 captive eye carabiner. This is a manually ejected model for assisted rescue, and DOES NOT auto-eject.

The U-RES-Q is available as an option to many FrenchCreek shock absorbing lanyards. A standard shock absorbing lanyard may save you in the event of a fall, but remaining suspended after the fall is another problem all together. It is common knowledge in the fall protection industry that every minute in suspension, after a fall, is extremely crucial! If even the slightest of falls should happen to occur, the light-weight pouch releases into rescue mode by automatically ejecting a high strength, 16' synthetic rescue ladder! At that point the worker can climb back to the work platform, or simply stand on the ladder to relieve pressure, increase blood flow, and ensure enough time for emergency response. The U-RES-Q is the most reliable, most secure product in alleviating Suspension Trauma. It relieves the leg harness tension caused by suspension, & is an option you can't afford to be without! The U-RES-Q is to be used in conjunction with a full body harness and a complete fall prevention/rescue program. It is also available as an 'add-on' option that can be utilized in-line with any standard shock absorbing lanyard and anchor point. To order "Z SERIES" compatible products (that meet ANSI Z359.1-2007) simply add a 'Z' to the end of the product # in which you are ordering.

rebar assemblies

positioning & restraint systems

These FrenchCreek positioning and restraint lanyards are used in situations to limit free fall distances to 2' or less. They quickly connect directly to rebar and other construction forms and structures. Choose between chain or webbing, non-swivel and swivel, and two #74N locking snaps.

♦♦ = Quick Ship Item

***NOTE:** We can customize any assembly to your needs & specific applications. Please inquire.

322-W - Web positioning assembly, #69 (1 3/4" opening) snap, no swivel, and two #74N locking snaps.

RENEGADE Toughness

Renegade series American-made SRL's provide the durability and confidence expected by professionals. With 13 ft. of working length and quick fall-arrest capability measured in inches, the Renegade will never let you down.

RENEGADE Durability

- Corrosion resistant housing made of aluminum and stainless steel, including a stainless steel top swivel
- High Strength wear-resistant webbing allows for 13 feet of capacity
- A variety of 5,000 pound connectors available, reducing the cost of ownership and allowing for customization
- Capacity of 400 pounds

RENEGADE Safety Performance

- No annual factory recertification required
- Double-inertia, high-strength stainless steel braking system arrests free falls within inches
- Visual impact indicator warns that the unit has experienced fall-arrest forces and must be removed from service
- Compact energy absorber minimizes fall-arrest forces
- Used in commercial & residential construction, manufacturing, refinery maintenance, utilities, and other industries

ROGUE Features

Swivel Anchor Loop limits twisting, Impact Indicator tears away for visual inspection, Short Fall Arrest Activation, Web Shock-pack tear away to reduce fall forces, 400 lb weight capacity, TRACKER capable, numerous options available.

ROGUE Durability

- High-strength, light weight, corrosion resistant housing, including a stainless steel top swivel
- High Strength wear-resistant webbing allows for 8 feet of capacity
- A variety of 5,000 pound connectors available, reducing the cost of ownership and allowing for customization
- Single or Double-leg connection, meets or exceeds OSHA & ANSI industry standards.

ROGUE Safety Performance

- No annual factory recertification required
- Double-inertia, high-strength stainless steel braking system arrests free falls within inches
- Visual impact indicator warns that the unit has experienced fall-arrest forces and must be removed from service
- Compact energy absorber minimizes fall-arrest forces
- Used in commercial & residential construction, manufacturing, refinery maintenance, utilities, and other industries

self retracting lifelines

Retractable lifelines provide extreme durability with high mobility! These units offer an extended range of movement, zero slack to eliminate tripping hazards, and a centrifugal braking system that engages at the slightest of falls! ♦♦ = Quick Ship Item

- ♦♦ **459** - 8' retractable web lanyard. A carabiner is included with every unit for anchorage attachment, as shown.

RL25A Series: Durable, lightweight, cast aluminum housing featuring a dual internal inertia braking system, external deceleration pack for ease of inspection, #354-2Z carabiner for anchoring, and choice of lifeline material.

- ♦♦ **RL25AGZ** - 25' of galvanized wire rope, as shown.
RL25ASZ - 25' of stainless steel wire rope.
RL25ATZ - 25' of Technora® synthetic rope.

RL30 / RL50 Series: Super-strong cast aluminum housing featuring a dual internal inertia braking system, internal deceleration braking system, swivel impact indicating snap hook, #354-4 carabiner for anchoring, and choice of lifeline material.

- RL30GZ** - 30' of galvanized wire rope, as shown.
RL30SSZ - 30' of stainless steel wire rope.
RL30TZ - 30' of Technora® synthetic rope.

- ♦♦ **RL50GZ** - 50' of galvanized wire rope, as shown.
RL50SSZ - 50' of stainless steel wire rope.
RL50TZ - 50' of Technora® synthetic rope.

100' Series: Super-strong cast aluminum housing featuring a dual internal inertia braking system, internal deceleration braking system, swivel impact indicating snap hook, #354-4 carabiner for anchoring, and choice of lifeline material.

- RL100GZ** - 100' of galvanized wire rope, as shown.
RL100SSZ - 100' of stainless steel wire rope.
RL100TZ - 100' of Technora® synthetic rope.

snap hooks & carabiners

steel

FrenchCreek offers an extensive supply of top quality one-handed operational, self-closing, auto-locking snap hooks and carabiners. Steel hardware is plated to meet all regulatory requirements and **"Z SERIES"** hardware meets the newest version of the ANSI Z359 standards. To order lanyards with **"Z SERIES"** rated hardware, simply add a Z to the part number.

(More "Z SERIES" info can be found on page 32)

'z series' snap hooks & carabiners

ANSI Z359 compliant hardware

FrenchCreek offers a full line of ANSI Z359 compliant hardware. One of the major updates to the Z359 Standard is the new gate strength requirements, which requires snap hooks and carabiners meet the following conditions:

- Gate Face must withstand a load of 3,600 lbs. (increased from 220 lbs.)
- Side of Gate must withstand a load of 3,600 lbs. (increased from 350 lbs.)
- Minor Axis of snap hooks or carabiners (except ones with captive eyes) must withstand a load of 3,600 lbs.
- Tensile load for snap hooks and carabiners must withstand a load of 5,000 lbs.
- All **"Z SERIES"** hardware shown on page 31 & 32.
- Simply add a "Z" to the part number you are ordering! (any product with snap hook possibilities)

**SIMPLY ADD A "Z"
TO THE PRODUCT #
YOU ARE ORDERING!**

lifelines

FrenchCreek lifelines are constructed of a 5/8" 3-strand polyblend synthetic rope, designed for excellent wear, strength, and limited stretch. *Standard lengths are available in 25' increments. Custom lengths are available upon request.*

♦♦ = Quick Ship Item

410 - 5/8" 3-strand polyblend synthetic lifeline with #74N locking snaps at each end. When ordering, final product #'s are designated by length: 25', 50', 100', 200', etc.

For example:

- ♦♦ **410-25** - 410, 25' in length.
- ♦♦ **410-50** - 410, 50' in length.
- ♦♦ **410-100** - 410, 100' in length.
- 410-200** - 410, 200' in length.

411 - 5/8" 3-strand polyblend synthetic lifeline with #74N locking snap at one end, thimble other end. When ordering, final product #'s are designated by length: 25', 50', 100', 200', etc.

For example:

- ♦♦ **411-25** - 411, 25' in length.
- ♦♦ **411-50** - 411, 50' in length.
- ♦♦ **411-100** - 411, 100' in length.
- 411-200** - 411, 200' in length.

121-1T - 5/8" 3-strand polyblend synthetic lifeline with thimble on one end. When ordering, final product #'s are designated by length: 25', 50', 100', 200', etc.

For example:

- 121-1T-25** - 121-1T, 25' in length.
- 121-1T-200** - 121-1T, 200' in length.

121-1S - 5/8" 3-strand polyblend synthetic lifeline with snap on one end. When ordering, final product #'s are designated by length: 25', 50', 100', 200', etc.

For example:

- 121-1S-25** - 121-1S, 25' in length.
- 121-1S-200** - 121-1S, 200' in length.

121-2T - 5/8" 3-strand polyblend synthetic lifeline with thimbles on both ends. When ordering, final product #'s are designated by length: 25', 50', 100', 200', etc.

For example:

- 121-2T-25** - 121-2T, 25' in length.
- 121-2T-200** - 121-2T, 200' in length.

rope & rope accessories

Order all of your rope from FCP! We can supply you with exactly what you need for all on-the-job applications! Don't see exactly what you're looking for, please inquire.

116-38 - 3/8" Kemmantele® rope, as shown.

116-716 - 7/16" Kemmantele® rope.

116-12 - 1/2" Kernmantle® rope.

120 - 1/2" 3-strand polyblend synthetic rope, as shown.

121 - 5/8" 3-strand polyblend synthetic rope, as shown.

121-N - 5/8" 12-strand polyester rope, as shown.

121-FN - 5/8" filament nylon rope, as shown.

125-FN - 3/4" filament nylon rope.

122 - 3/8" polypropylene rope, as shown.

123 - 1/2" polypropylene rope.

RL-27T12 - 3/16" 12-strand Technora® rope, as shown.

121CW - 5 lb. flexible counterweight bag to keep lifeline tensioned, to prevent excess slack, and facilitate performance of a trailing rope grab.

121RP - 20" long 4 ply 600 denier polyester rope protector with velcro and tie strap closure. For vertical or horizontal use.

♦♦ **1710** - Aluminum rope termination plate for 5/8" rope lifelines without the need for knots, splicing, or crimping. (Plate ONLY - does not come with rope)

rope grabs

rope & wire rope

FrenchCreek offers a comprehensive line of durable, user friendly rope grabs & wire rope grabs. (Lifelines can be purchased separately, and are shown on page 33.) The grabs are available in two different styles:

Manual Rope grab:

Worker manually slides the device to the desired position on the rope and releases it, locking it on the lifeline and providing the worker with fall protection. Great for sloped roofs because they lock in place once positioned.

Trailing Rope grab:

Little or no user positioning needed. Trailing grabs move up and down the lifeline with the worker, locking only when a fall occurs.

FrenchCreek strongly recommends that lanyard length not exceed 3' when in use with a rope grab. This aids OSHA compliance and helps to reduce free-fall distances.

Rope Grabs:

♦♦ = Quick Ship Item

- ♦♦ 1201 - Stainless steel trailing rope grab for use on 5/8" and 3/4" 3-strand synthetic rope. Attachable, detachable anywhere on lifeline, as shown.
- ♦♦ 1201N - Stainless steel trailing rope grab for use on 5/8" 3-strand synthetic rope. Attachable, detachable anywhere on lifeline, as shown
- 1202N-3 - 1201N with 3' lanyard, #74N locking snap on end.
- ♦♦ 1202AN-3 - 1201N with 3' shock absorbing lanyard, #74N locking snap on end.
- 1202-3 - 1201 with 3' lanyard, #74N locking snap on end.
- 1202A-3 - 1201 with 3' shock absorbing lanyard, #74N locking snap on end, as shown.
- ♦♦ 1261 - Trailing rope grab for use on 5/8" 3-strand synthetic rope. Comes with "gravity washer" to prevent user from installing incorrectly. Attachable, detachable anywhere on lifeline, as shown.
- 1262-3 - 1261 with 3' lanyard, #74N locking snap on end.
- 1262A-3 - 1261 with 3' shock absorbing lanyard, #74N locking snap on end.
- 1352A-3 - Manual Rope grab, plated steel for use on 5/8" 3-strand synthetic rope. Not attachable, detachable anywhere on lifeline, as shown.

Wire Rope Grabs:

- ♦♦ 1401-38 - Stainless steel trailing cable grab for use with 3/8" and 5/16" wire rope, as shown.
- 1401A-38 - Stainless steel trailing cable grab for 3/8" and 5/16" wire rope, shock absorber, and carabiner.

roofer's kit**rk deluxe series kit**

FCP Roofing Kits come ready to install. A variety of roof anchors and multiple lengths of kits are available to fit many residential and industrial applications.

RK Deluxe Roofer's Kits include:

MRA-R double-plate roof anchor (page 36), 410 5/8" lifeline (page 33) with self-locking snaps on each end, 1202AN-3 stainless trailing rope grab with 3' shock absorbing lanyard (page 34), 631 full body harness (page 11), carry bag, and instruction manual, as shown.

RK-25 - 25' working length kit.

RK-50 - 50' working length kit, as shown.

RK-100 - 100' working length kit.

**roofer's kit****rkb series kit**

RKB Kit configurations are based upon the desired roof anchor and length of rope necessary to fit the application. Components shown to the left are included in all RKB Kits. Choice of anchor and corresponding Kit numbers are shown below.

RKB Kits include:

Desired roof anchor (below), 411 5/8" lifeline with a self-locking snap on one end and an eye thimble on the other end (page 33), 1352A-3 manual rope grab with 3' shock absorbing lanyard (page 34), 631 full body harness (page 11), storage bucket with lid, and instruction manual, as shown.

**Want a bag instead of a bucket?**

beam trolley & beam anchor

106 - FCP's Beam Trolley slides along the beam with the worker for maximum mobility. The flange width is adjustable from 3"-8", the maximum flange thickness is 1", and the minimum radius bend is 2'. The trolley provides a maximum capacity rating of 400 lbs., as shown.

1700 - Adjustable sliding beam anchor for 3 1/2" to 12" wide flange, up to 1 1/4" thick. Can be used on the top or bottom of I-beam, and will slide along the beam as the worker moves. The unit features double stainless springs, double action one-handed quick release latches, double-toothed latches, a centered D-ring for a smoother slide, and an ultimate tensile rating of 5,000 lbs.

1702 - Adjustable sliding beam anchor for 3 1/2" to 12" wide flange, up to 1 1/4" thick. Can be used on the top or bottom of I-beam, and will slide along the beam as the worker moves. The unit features a quick release latch for one handed operation, and a floating D-ring. It has an ultimate tensile rating of 5,000 lbs.

1700

1702

FCP's steel anchorage connectors are removable, reusable, and are made to be mounted on solid steel structures and/or steel I-beams. ♦♦ = Quick Ship Item

- ♦♦ 1550 - D-bolt anchor for up to 2 1/2" working thickness includes a 5/8" bolt assembly, as shown.
- ♦♦ 1701 - Bolt-on Anchor Plate w/ D-ring, as shown.
- 1701-CSW - Weld-on carbon steel Anchor Plate w/ D-ring.
- 1701-SSW - Weld-on stainless steel Anchor Plate w/ D-ring.
- 1760-12S-S - Post anchor w/ 360° swivel D-ring. Comes with mounting hardware. Also available in 18" model.
- ♦♦ 1769 - Spring action Girder Anchor offers one-handed operation for a variety of applications. Fits 3/4" - 1 1/4" hole diameter, maximum 1" thick material, as shown.
- 1775-S3 - 1/4" stainless steel anchor plate, six ply webbing, plated steel D-ring, and 3" bolt, washers & nut for steel applications.

anchorage connectors

concrete series

FCP's disposable concrete anchor straps (1124C & 1124CND) are designed to provide temporary anchorage in concrete. The 1 3/4" wide abrasion resistant webbing and forged steel D-ring are rated at 5,000 lbs. ♦♦ = Quick Ship Item

1124C - 2' concrete anchor strap with D-ring, as shown.

1124CND - 2' concrete anchor strap with web loop, as shown.

1136C - 3' concrete anchor strap with D-ring.

1136CND - 3' concrete anchor strap with web loop.

1148C - 4' concrete anchor strap with D-ring.

1148CND - 4' concrete anchor strap with web loop.

♦♦ **TC100** - Concrete anchor that is placed through a hole in the concrete floor, providing workers on a lower level an over-head anchor. Anchor is as shown.

1760-12S-C - Post anchor w/ 360° swivel D-ring. Comes with mounting hardware. Also available in 18" model.

♦♦ **1770** - 3/4" portable/reusable concrete hole anchor, rated to 5,000 lbs. Can be used for vertical and overhead concrete applications.

1775 - Concrete anchor with stainless steel plate, six ply webbing, plated steel D-ring, & one concrete bolt.

1775B10 - 10 pack of disposable concrete anchor bolts.

1775B20 - 20 pack of disposable concrete anchor bolts.

1780-24 - 24" ColumnCrete Anchor - reusable two person anchor point that installs through concrete columns. When pouring columns, insert PVC tube that will allow for insertion, use, and removal of anchor.

1780-36 - 36" ColumnCrete Anchor - reusable two person anchor point that installs through concrete columns. When pouring columns, insert PVC tube that will allow for insertion, use, and removal of anchor.

door jamb anchor ** = Quick Ship Item

♦♦ 1785 - The FCP Door Jamb Anchor is designed to be used as a temporary anchor that mounts in door or window openings from 24" to 43" wide. Applications include construction, roof tops with door entrances, elevator shafts, wall openings, emergency & rescue situations, and more. Features one fixed leg and one adjustable leg (with multiple pin sets & adjustable mounting pad), the unit can be sized and secured without the use of tools. The FCP Door Jamb Anchor meets or exceeds all OSHA requirements.

1785 Door Jamb Anchor Installed

parapet wall anchor ** = Quick Ship Item

♦♦ 1789 - The FCP Parapet Wall Anchor is designed to provide a single worker with a portable, temporary anchorage on parapet walls up to 20" thick. Applications include window washing, construction, emergency & rescue situations, and more. Features one padded fixed leg and one padded adjustable leg (with multiple pin sets & adjustable mounting pad), the unit can be sized and secured without the use of tools.

1789 Parapet Anchor Installed

rail anchor

1790 - The rail anchor is designed to meet the needs of those workers that are working on railway line that requires a compliant means to anchor a personal fall arrest system. The anchor allows the user to quickly and easily affix the anchor unit to a rail (55-100 lb rail) and then attach the personal fall arrest system. The unit is designed to allow some horizontal movement by sliding along the rail, but it is not designed to pass rail splice plates.

multi-use anchorage connectors

♦♦ = Quick Ship Item

FCP's multi-use anchorage devices can be used in a variety of applications, however some limitations may apply. FCP's consultations experts are available for inquiries, and can make recommendations concerning the proper anchorage connector for your job.

1824 - 24" Anchor Strap rated to 400 lbs. is designed for use on scaffolding, pipe, or angle iron. Features one-handed operating rebar snap #136 (page 31), and connecting D-ring on the other end, as shown.

♦♦ **1503** - 5" stainless steel wire hook anchor is rated to 400 lbs, and can connect to various approved anchorages including railings, smaller I-beams, angle iron or scaffolding, as shown.

4150 - 4' Boom strap anchor attaches to boom quickly and easily with friction buckle design. Featuring 1 3/4" polyester webbing and coated steel hardware, anchor provides a minimum tensile rating of 5,000 lbs., as shown.

4157 - 5' Boom strap anchor with ratcheting buckle design. Featuring 1 3/4" polyester webbing and coated steel hardware, anchor provides a minimum tensile rating of 5,000 lbs., as shown.

horizontal lifeline systems

Manufactured of synthetic rope or wire rope, FCP's horizontal lifeline systems allow one or two workers (up to 310 lbs. each) to remain tied off while in horizontal transition between two anchor points. The lifelines can be anchored by anchorage tie-off straps, D-bolt anchors, anchor plates, or other compatible connectors. The line tensioner on the rope system is used for line adjustment and proper tension. Wire rope systems use a turn buckle and combination clamp to achieve proper adjustment and tension. All Horizontal Lifeline's come in standard lengths of 30' or 60'.

RHL-30 - 30' temporary premium nylon rope HLL with tensioner, tie-off straps, and carry bucket.

RHL-60 - 60' temporary premium nylon rope HLL with tensioner, tie-off straps, and a carry bucket. Lifeline is shown.

RHLD-30 - 30' temporary, low stretch rope HLL with in line shock absorber, tensioner, tie-off straps, and carry bucket.

RHLD-60 - 60' temporary, low stretch rope HLL with in line shock absorber, tensioner, tie-off straps, and carry bucket. Lifeline is shown.

CHL-30 - 30' temporary wire rope HLL with in line shock absorber, tie-off straps, connectors, and carry bucket.

CHL-60 - 60' temporary wire rope HLL with in line shock absorber, tie-off straps, connectors, and carry bucket. Lifeline is shown.

MiniVerse - horizontal lifeline system

The MiniVerse Series HLL offers ideal protection when an overhead anchorage does not exist. Providing continuous fall protection, with a maximum of 60' between posts, systems can be assembled from 10'-360'. Intermediate posts with a pass-thru bracket allow for a continuous run of the system. A coiled energy absorber helps reduce forces in the event of a fall. Posts are available in 12" & 18". Install as a temporary or permanent system. 3" vent pipe boots will be needed for permanent installation.

Model Number	Description	Weight (lbs.)
Posts		
1760-12-1525	12" Anchor End Post	33
1760-12P	12" Anchor Post with Pass-Through	34
1760-18-1525	18" Anchor End Post	35

* These systems are not covered under FCP's Freight Policy *

MiniVerse system in use.

TEMPORARY HORIZONTAL LIFELINE TRAVERSE

MADE IN
U.S.A.

TRAVERSE Horizontal Lifeline System

The TRAVERSE Series temporary horizontal lifeline offers ideal protection when an overhead anchorage does not exist, allowing up to two workers to tie off in each span. The TRAVERSE HLL provides continuous fall protection for the length of the line. The 42" tall end posts of the system are offset for ease of use, and can be set up to any cable length with a maximum of 60' between posts. Intermediate posts can be outfitted with a pass-thru/bypass bracket to allow a connector to continuously run the length of the system. Systems can be assembled in many different lengths, from 10'-360' (in 10' increments). Standard systems work on I-beams from 6"-12" wide, and 2 1/4" thick flanges. Options are available for beams up to 36" wide.

- ◆ All steel construction
- ◆ Super easy set-up
- ◆ Standard system fits beam size: 6"-12"w, up to 2 1/4" flange
- ◆ Options are available for beams up to 36"
- ◆ Systems can be assembled in lengths from 10'-360'
- ◆ Allows 2 workers to tie off in each span, 6 workers total
- ◆ Meets or exceeds OSHA & ANSI requirements

Also Shown:

- STRATOS Full Body Harness
- ROGUE Dual-Leg sub-compact SRL

tower, ladder, rail climbing systems

FrenchCreek's rigid rail climbing systems provide maximum climbing safety for workers in a multitude of applications, such as: towers, antennas, chimneys, stacks, scaffolds, support poles, wind generators, signs, water tanks, dams, silos, shipboard, ladders, and virtually any place that climbing must be done! The rail attaches quickly and easily to any ladder, step iron, or climbing surface. The trolley moves freely along the rail until a slip or fall occurs, when the trolley instantly locks, and the fall is immediately arrested.

♦♦ = Quick Ship Item

Rails:

- 1-1100-AR - Anodized aluminum climbing rail, with all mounting hardware included.
- 1-1105-SS - 316 stainless steel climbing rail with all mounting hardware included.
- 1-1100-CR - Curved anodized aluminum climbing rail, with all mounting hardware included.

Trolleys:

- ♦♦ 2-1200A-AT - Climbing trolley for straight, vertical aluminum rail, as shown.
- 2-1221A-AT - Aluminum climbing trolley for curved/straight climbing rail.
- 2-1223-AT - Aluminum trolley for horizontal rails, as shown.
- ♦♦ 2-1224A-AT - Climbing trolley for stainless steel & aluminum climbing rails.

2-1200A-AT

Horizontal Trolley and Rail System

2-1223-AT

tower, ladder, rail climbing systems

optional equipment

♦♦ = Quick Ship Item

Removable Extension - The removable extension is used to access a permanent rail system/ladder from the top, when a permanent extension is not possible or desirable. The extension is positioned into the existing permanent rail with a machined high-strength alignment bar and support channel, as shown.

- ♦♦ 5-1501 - 54" removable aluminum extension rail, as shown.
- ♦♦ 5-1502B - 42" removable stainless steel extension rail.

Ladder Rung Clamps - Ladder rung clamps are included with the FCP Rigid Rail Climbing System, however, you have the option to choose the style of ladder rung clamps that will best fit your installation site. Choose from a variety of shapes and sizes, as shown. Hardware to mount to side riser of ladder is also available. Please inquire at time of ordering.

Ladder Rung Clamps

Removable Extension
5-1501

TOWER SAFETY SYSTEMS

flexible cable climbing systems

All FCP flexible cable climbing systems come with: top bracket, bottom bracket with tensioner, rung clamps for up to 1-1/8" diameter rungs, 3/8" galvanized wire-rope lifeline permanently terminated at one end and clips on the other end, and the appropriate amount of cable guides based upon length of system. Standard lengths vary from 20' to 300'.

Mounting hardware is available for other applications besides fixed ladders, and systems can also be made to accommodate tank or roof curvature. Please contact us for custom configurations or applications.

Full body harness and cable grab sold separately.

Vertical Flexible Cable Climbing Systems:

VL-38 When ordering, final product #'s are designated by length, with standard lengths ranging in 10' increments from 20' to 300'. (does not include wire rope grab)

For example:

VL-38-20 - VL-38, 20' in length

VL-38-300 - VL-38, 300' in length

Flexible Cable Climbing System Components:

1401A-38 - Stainless steel trailing wire rope grab for 3/8" wire rope, shock absorber, and carabiner.

VL-CG - Cable guide, fits up to 1 1/8" ladder rung.

C38 - 3/8" wire rope assembly for wire rope climbing systems, permanent eye one end, wire rope clips and thimble other end. When ordering, final product #'s are designated by length, with standard lengths ranging in 10' increments from 20' to 300'.

For example:

C38-20 - C38, 20' in length

C38-300 - C38, 300' in length

VL-38

ladder lock system

♦♦ = Quick Ship Item

♦♦ **4-1000** - FCP's Ladder Lock System is constructed of heavy-gauge, rust proof aluminum. The braces and hardware are made of galvanized heavy gauge steel. Installation is easy (no welding or cutting), just bolt the hardware in place, and secure for a no maintenance, permanent installation that will prevent the ladder from unauthorized use.

Dimensions: 8' high x 36" wide x 1/8" thick.

4-1000

Rescue, Recovery, &

FCP OFFERS EVERYTHING YOU NEED FOR CONFINED SPACES!

FrenchCreek manufactures top quality rescue equipment, complete rescue systems, and accessories to aid in rescue or recovery, all of which meet or exceed the OSHA requirements for confined space rescue! We can also manufacture Custom Products for specific job applications. Please inquire for more information concerning customized products.

Confined Space Systems

47

rescue, recovery, confined space

confined space systems

♦♦ = Quick Ship Item

R50 Series, 3-way Unit

The R50 Series Unit is a self-retracting lifeline, capable of raising and lowering, for rescue or retrieval. If a worker slips or falls, the unit locks up, arresting the fall. The system can then be activated into winch mode, raising or lowering the worker to safety. The R50 also has a friction brake that prevents the crank handle from free-wheeling while under a load. The unit is manufactured of a rugged, lightweight cast aluminum housing, and includes a mounting bracket for FCP's Tripod or Davit Systems, a #45 split pulley, and carabiner for attaching the lifeline to an anchor such as a tripod. Order the R50 unit by choosing the preferred type of line:

- ♦♦ **R50G** - 50' galvanized wire rope, as shown.
- R50SS** - 50' stainless steel wire rope.
- R50T** - 50' Technora® synthetic rope.

MW Series:

The MW Series winches offer raising and lowering capabilities with a friction brake that prevents the unit from free-wheeling when under a load. Manufactured of a rugged steel frame and drum, the unit includes a #45 pulley, and a carabiner for attaching the line to an anchor such as a tripod. Order the MW unit by choosing the preferred length and type of line:

- ♦♦ **MW50G** - 50' galvanized wire rope, as shown.
- MW50SS** - 50' stainless steel wire rope.
- MW50T** - 50' Technora® synthetic rope.
- MW100G** - 100' galvanized wire rope.
- MW100SS** - 100' stainless steel wire rope.
- MW100T** - 100' Technora® synthetic rope.

TP7 Series Tripods:

FCP confined space tripods are designed to withstand 5000 lbs of vertical load, yet are lightweight and portable, offering single person setup that is quick and easy. TP Series tripods feature adjustable/locking aluminum legs, safety chain, non-slip rubber safety shoes, and two attachment points on the steel head.

- ♦♦ **TP7** - 7' aluminum tripod, 2 attachment points on head.
- ♦♦ **TP9** - 9' aluminum tripod, 2 attachment points on head.

Tripod Systems: (use 9 in place of 7 to order the 9' tripod)

- ♦♦ **S50G-7** - TP7 tripod, R50G rescue unit.
- S50SS-7** - TP7 tripod, R50SS rescue unit.
- ♦♦ **R50G-TP7** - TP7 tripod, R50G rescue unit, 204 bag.
- R50SS-TP7** - TP7 tripod, R50SS rescue unit, 204 bag.
- ♦♦ **S50G-M7** - TP7 tripod, R50G rescue unit, MW50G work winch, as shown.
- S50SS-M7** - TP7 tripod, R50SS rescue unit, MW50G work winch.

quad pod & davit systems

With the capabilities of an interchangeable arm, the Quad Pod base and Davit bases can be shared between one fall arrest/raising/lowering arm.

Quad Pod System:

FCP's rugged and versatile Quad Pod System can be used as an alternative to a Tripod System. The free standing portable base has adjustable feet and folds for easy carrying. The arm pivots 360° and includes a 50' fall arrest/rescue retractable unit, and a 50' winch unit with raise and lower capabilities.

FCPQ200 - Complete Quad Pod System, as shown.

FCPBOOM - Boom ONLY (does not include a mounting base).

FCPBASE-FOURLEG - Quad Pod 4-leg base ONLY (does not include Davit arm).

Davit System:

The FCP Davit System bases can be permanently mounted where conventional Tripods or Quad Pod Systems are impractical to use. The arm pivots 360° and includes a 50' fall arrest/rescue retractable unit, and a 50' winch unit with raise and lower capabilities. One interchangeable Davit arm can be used on several permanent bases at different locations.

FCPD300 - Complete Davit System, as shown.

FCPBOOM - Boom ONLY (does not include a mounting base).

FCPD300BASE - Davit Base ONLY (does not include Davit Arm or Riser Pole). Many bases can be purchased & mounted. The Riser Pole & Davit Arm can be interchanged.

FCPRISER - Riser Pole for Davit Base.

WE ARE YOUR PREMIER
SOURCE FOR CONFINED SPACE &
RESCUE/RECOVERY SYSTEMS!

controlled descent devices

♦♦ = Quick Ship Item

- ♦♦ **199D** - Manually operated controlled descent device and a 354-2 carabiner, commonly used for:

Suspended Work Positioning:

- window washing, exterior building maintenance, tower erection, bridge construction, etc...

Emergency Self-evacuation:

- escaping from equipment (cranes, buckets, towers, etc...)

Rescue / Recovery Situations

The device can be used with a full body harness or work seat, along with an appropriate fall arrest system. Used on a single 7/16" (11 mm) piece of approved rope (at any length), the operator can install the device at any point along the rope. As the lever on the device is moved, friction on the rope decreases and the device will descend. As a protective measure, when the control lever is unintentionally fully pressed or fully released, as in a panic situation, the friction increases and the descent is stopped.

The controlled descent device can also be inverted and attached to the anchor, to be operated by rescue personnel, to lower another individual. The system comes in standard length increments of 50'.

Controlled Descent Kits - Standard Kits include: desired length of rope with thimble eye on one end, two #354-2 carabiners, 199D controlled descent device, and drawstring carry bag.

199-50 - 50' Kit.

199-100 - 100' Kit.

199-200 - 200' Kit.

rescue, recovery, confined space

system 99

self-raising / self-lowering system

99B - FCP's **SYSTEM 99** is a versatile lifting and lowering system that can be used for Utility/Work Systems or for Rescue & Recovery. The **SYSTEM 99** is a lightweight, compact universal system that can be set up in a few seconds and performs a variety of functions. With a mechanical advantage of 3:1, it can easily be operated by one person. Should an emergency situation occur, a top-side observer or worker can utilize the system to rescue an incapacitated worker. The lightweight design is extremely beneficial, with a 200 ft. long system weighing in at only 52 lbs! The system comes complete with two carabiners, one for connection to the anchorage, one for connection to the user, plus an ascender handle with lanyard. When ordering, final product #'s are designated by length. For example:

99B-50 - System 99 in 50' length.

99B-100 - System 99 in 100' length.

99B-200 - System 99 in 200' length.

In use:
- 99B raising/lowering system
- 22030B-BLK Navigator Harness

99B

Remote Prompt Rescue

RPR KITS ARE DESIGNED FOR IMMEDIATE WORKER ASSISTED RESCUE

Time is one of the most valuable assets in any emergency. In an ideal situation, a trained, qualified co-worker can immediately assist another worker in the event of a fall. The system allows a capable worker to attach a raising/lowering system to the fallen workers harness D-ring, providing a means for rescue.

RPR-50 Remote Prompt Rescue Kit

Shown in Action:

- RPCC-12 Extension Rescue Pole
- 99B 50' System 99

Also being used:

- 22850B STRATOS Harness
- RL50G Retractable lifelines
- 1700 Sliding Beam Anchor
- 1702 Sliding Beam Anchor

rpr kits - remote prompt rescue

- RPR-25** - RPCC-12 rescue pole assembly w/ bag & 25' 99B System 99 w/bag (page 49).
RPR-50 - RPCC-12 rescue pole assembly w/ bag & 50' 99B System 99 w/ bag (page 49).
RPCC-12 - 6'-12' extendable rescue pole, carabiner holding clip, 354-2Z twistlock carabiner w/ 1" gate (page 31), and 12" tegline, and bag. 99B System 99 NOT included.

confined space accessories

♦♦ = Quick Ship Item

- ♦♦ **45** - Split pulley, stainless sheave, aluminum sides.
- ♦♦ **354-2Z** - Twistlock carabiner, 1" gate (page 31).
- ♦♦ **354-5** - Twistlock carabiner, 3/4" gate (page 31).
- ♦♦ **204** - 16"x12"x10" hard bottom winch bag with handle and velcro closure.
- 206** - 32" dia. x 66", 7' tripod carrying bag (page 52).
- 207** - Wristlets (pair).
- 207Y** - Wristlets (pair) with yoke.
- 207YL** - Wristlets (pair) with yoke and 25' tagline.
- 702Y** - Web yoke assembly with spreader bar.

flexible access ladders

FCP Flexible Access Ladders are constructed of high strength webbing and 1 1/4" diameter round fiberglass rungs that are 12" wide. Each ladder comes complete with two #354-2 carabiners (page 31). Multiple ladders can be joined together using carabiners, or you can order a longer length, or a custom length.

WL-10 - 10' flexible web ladder, two #354-2 carabiners.
WL-20 - 20' flexible web ladder, two #354-2 carabiners, as shown.

WL-30 - 30' flexible web ladder, two #354-2 carabiners.

WL-40 - 40' flexible web ladder, two #354-2 carabiners.

WL-50 - 50' flexible web ladder, two #354-2 carabiners.

354-2 - Twistlock carabiner 1" gate. Connect ladders, or use to connect to anchorage (page 31).

This sample ladder shows how all web ladders can be joined with Carabiners.

carry bags & pouches

FCP offers a wide range of carry and tool bags, from small utility bags for carrying safety glasses or respirators, to larger bags to help transport fall arrest or confined space equipment. If you need a longer bag, shorter bag, personalized silk screening, or any sort of custom bag, please inquire. We may be able to manufacture exactly what you need!

♦♦ = Quick Ship Item

- 203 - 17"x8.5"x8.5" carry bag with handle and zipper closure, as shown.
- ♦♦ 204 - 16"x12"x10" hard bottom carry bag with handle and velcro closure, as shown.
- ♦♦ 206 - 32" dia. x 66", 7' tripod carrying bag, as shown.
- 206-9 - 9' tripod carrying bag.
- 208 - 8.5" dia. x 12" h, drawstring bag, as shown.
- 208-1 - 11" dia. x 14" h, drawstring bag.
- ♦♦ 208Z - 19"x9"x9" carry bag with handle and zipper closure, as shown.
- 211 - 5"x3"x9" lanyard pouch, as shown.
- 220 - 8"x4"x10" nut and bolt bag with tool belt loops and velcro closure.

For Firefighters ONLY

PacMule Firefighter Belt

SPECIALLY DESIGNED BY FIREFIGHTERS, FOR FIREFIGHTERS!

This lightweight series of fireman's belts integrates 1 3/4" webbing rated at 10,000 lbs, a 4" Coolmax-lined comfort back pad with 3M Scotchlite highly reflective material, patented drop-down tool D-rings with snap closures to keep D's out of the way when not in use, forged front bailout ring with snap closure, choice of quick release front snap or tongue & grommet front buckle, & two rear carabiner slots for additional gear attachment. Exceeds NFPA standards for escape belts.

***These belts are for Firefighters ONLY, and are NOT intended for generalized fall protection!**

◆ QN4105FB - Fireman's Escape Belt

Adjustable quick-clip waistbelt, 2" forged front bailout D-ring, two 2" drop-down tool D-rings on the hips, all D-rings secure with snap closures when not in use.

◆ QN4107FB - Fireman's Escape Belt

Adjustable quick-clip waistbelt, 2" forged front bailout D-ring, two 3" drop-down tool D-rings on the hips, all D-rings secure with snap closures when not in use.

◆ QL4107FB-18 - Fireman's Ladder Belt

Adjustable quick-clip waistbelt, 1 3/4" front bailout D-ring, 18" tie-off lanyard with 1 7/8" carabiner, two 3" drop-down tool D-rings on the hips, the D-rings and lanyard secure with snap closures when not in use.

◆ QL4109FB-18 - Fireman's Ladder Belt

Adjustable quick-clip waistbelt, 1 3/4" front bailout D-ring, 18" tie-off lanyard with 1 7/8" carabiner, one 3" drop-down tool D-ring & one 2" drop-down tool D-ring on the hips, the D-rings and lanyard secure with snap closures when not in use.

◆ GL4107FB-18 - Fireman's Ladder Belt

Adjustable tongue & grommet waistbelt, 1 3/4" front bailout D-ring, 18" tie-off lanyard with 1 7/8" carabiner, two 3" drop-down tool D-rings on the hips, the D-rings and lanyard secure with snap closures when not in use.

◆ GL4109FB-18 - Fireman's Ladder Belt

Adjustable tongue & grommet waistbelt, 1 3/4" front bailout D-ring, 18" tie-off lanyard with 1 7/8" carabiner, one 3" drop-down tool D-ring & one 2" drop-down tool D-ring on the hips, the D-rings and lanyard secure with snap closures when not in use.

Belts are color coded to size. (All belts shown above are size Large, therefore come in Blue)

SIZE	S	M	L	XL	XXL
WAIST	20-28	28-34	34-40	42-50	52-60
COLOR	GREEN	BLACK	BLUE	YELLOW	RED

Please order according to your actual waist size.

PacMule sizing is based upon waist size, then belts are made larger to fit over turn out gear.

Fall Protection & Confined Space Training

*** TRAINING CAN BE DONE AT OUR LOCATION, OR AT YOURS ***

FCP's fall protection / confined space / rescue training programs provide you and your employees with the timely product and knowledge requirements that they need to be productive, safe and in compliance. We offer a variety of training courses, ranging from strictly classroom discussion courses to courses that involve hands-on training. Training can be done at your facility or ours. With our training, your employees will have the skills and knowledge to be safer and in compliance with today's laws and regulations.

training programs

FrenchCreek's Corporate Training Facility

#T101 4 Hour Introduction to Fall Protection

Provides a basic overview of the key OSHA and ANSI requirements. Harness, lanyard, retractable, and anchor point inspection. Proper donning, care, and use will also be discussed, as will common hazards.

#T102 4 Hour Authorized Equipment Inspector

Attendees will experience visual and hands on training regarding the inspection of fall protection materials, components, equipment, and systems. Attendees will learn how to perform a daily inspection and a semi-annual, documented inspection as required by ANSI.

#T103 8 Hour Authorized User (Fall Protection)

Provides an overview of the OSHA and ANSI requirements. Harness, lanyard, retractable, and anchor point inspection. Proper donning, care, and use will also be discussed. Attendees will participate in the selection of proper equipment to eliminate or minimize fall hazards commonly experienced on the jobsite. Basic rescue procedures will be discussed.

#T104 8 Hour Authorized Fall Protection Rescuer

Attendees will review the OSHA and ANSI requirements regarding rescue and fall protection. The FCP #199Dond System #99 rescue systems will be explored and used. Attendees will perform hands on rescue of weights, themselves, and others. Note: Attendees should have a first aid/CPR/AED certification or plan on acquiring one.

#T105 8 Hour Confined Space Entrant / Attendant / Supervisor / Rescue

Attendees will review the OSHA and ANSI requirements regarding the safe entry and escape of a confined space. Attendees will use the OSHA flow chart and entry checklist to determine if the space is considered "Permit or Non-permit required". Terminology, equipment selection, duties, installation, inspection, care, and use will be explored. The tripod will be the primary anchor point used, but variations and component options will be discussed. Note: Attendees should have a first aid/CPR/AED certification or plan on acquiring one.

#T106 16 Hour Competent Person (Fall Protection)

The attendees of this course will examine the OSHA construction and general industry standards, along with key letters of interpretation and industry guidelines. This course will highlight the key points of the ANSI construction and general industry standards. Equipment operation, limitations, inspection, care, and use will be discussed in depth. Common hazards will also be discussed, as will the methods to eliminate or control them. Rescue requirements, means, and options will be reviewed.

#T109 Customized Courses

Please contact us with your requirements and we will be happy to furnish you with a quote to your specifications.

OSHA Outreach Training

10 & 30 HOUR CONSTRUCTION COURSES

* TRAINING CAN BE DONE AT OUR LOCATION, OR AT YOURS *

Our courses are designed and provided by instructors who have many years in the fall protection field, so they can relate to the situations that your employees encounter. We can also custom tailor courses to your specific needs or requirements.

Fall Prevention and Protection is one of OSHA's Focus Four and typically the most cited violation.

Our OSHA courses place an emphasis on **Fall Prevention and Protection** from trainers with years of experience in the fall protection field.

In the chart to the right, you will see the OSHA modules we offer and the typical times allotted to each.

Upon successful completion of the course, the attendee will receive a **course completion card from OSHA!**

DVD - guide to fall protection

Professional's Guide to Fall Protection is intended to assist with the development and implementation of a successful fall prevention program. By outlining the key ingredients of a fall protection plan, the guide comprehensively reviews standards, regulations, selection of equipment, and the importance of a proper fall protection plan.
