# **Quality & Engineering**

The Caldwell Group has been manufacturing lifting equipment since 1954. It is our goal to manufacture high quality, long lasting lifting products that will safely increase productivity and reduce operating costs.

Both OSHA and ANST/ITSDF indicate modifications and additions to a fork truck require prior written approval from the original fork truck manufacturer.

OSHA 1910.178(a)(4) states "Modifications and additions which affect capacity and safe operation shall not be performed by the customer or user without manufacturers prior written approval. Capacity, operations, and maintenance instruction plates, tags, or decals shall be changed accordingly."

ANSI/ITSDF B56.10-2006 4.2.1 states "no modification or alterations to a powered industrial truck that may affect the capacity, stability or safe operation of the truck, shall be made without the prior written approval of the original truck manufacturer or its successor thereof. When the truck manufacturer or its successor approves a modification or alteration, appropriate changes shall be made to capacity plates, decals, tags, and operations and maintenance manuals."

ANSI/ITSDF B56.10-2006, Part III, 7.4.5 - The attachment manufacturer shall install a durable, corrosion resistant nameplate, with the following information legibly and permanently inscribed:

- Model designation
- Serial Number
- Maximum hydraulic pressure (on hydraulically actuated attachments)
- Weight (value to be accurate +/-5%)
- Capacity
- The following instruction (or equivalent): Capacity of truck and attachment combination may be less than capacity shown on attachment. Consult truck nameplate.

### **Caldwell Delivery Programs**

The Caldwell Group offers two quick delivery programs, INSTOCK and QUICKSHIP.

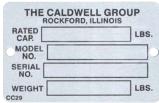

Look for the green INSTOCK logo on our standard products. The specific INSTOCK model number is shown in green. INSTOCK products ship in 48 hours.\*

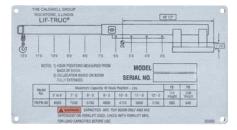

Look for the red QUICKSHIP logo on our standard products. The specific QUICKSHIP model number is shown in red. QUICKSHIP products ship in 7 to 10 days.\*

\* Excluding weekends and holidays.

**DISCLAIMER:** 

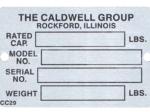

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

your specific application and may not look exactly like the picture in this catalog.

## **Model FB - Telescopic Fork Lift Booms**

The Fixed Length Boom, Model FB, has a telescoping boom with a maximum horizontal reach of 12 feet. This model is available in 3,000, 4,000, 6,000 and 8,000 lb. capacities.

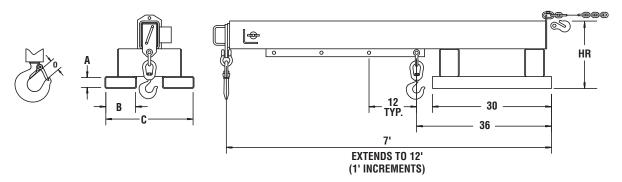

### **PRODUCT FEATURES:**

- Alternate hook positions.
- Telescoping boom.
- Restraining chain with grab hook.

- Handle at end for easy extension.
- Fixed or swivel hooks available.
- Boom locking t-pin.

Model FB Fixed Type Fork Lift Boom

NOTE: All dimensions on drawings shown in inches unless stated.

BOOMS

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

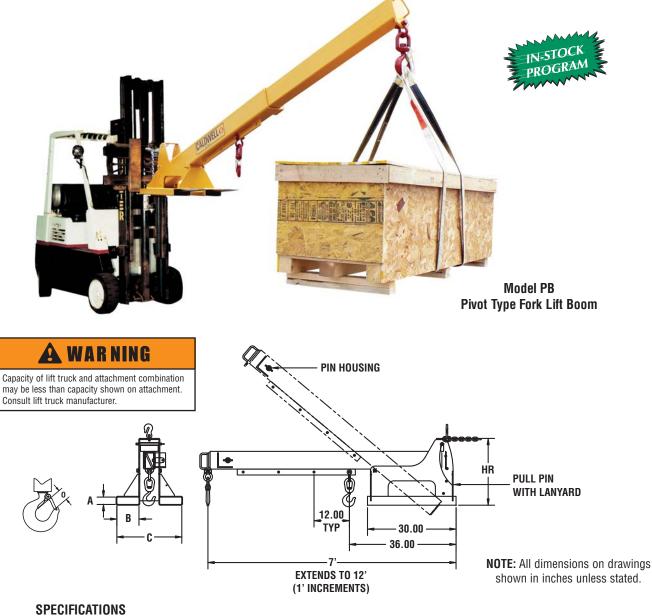

## **Model PB - Telescopic Pivoting Fork Lift Booms**

The Pivot Boom, Model PB, has a telescoping boom with a maximum horizontal reach of 12 feet. This model is available in 3,000, 4,000, 6,000 and 8,000 lb. capacities. The versatile Model PB is adjustable vertically in five increments up to a maximum of 40 degrees.

### **PRODUCT FEATURES:**

- Alternate hook positions.
- Telescoping boom.
- Restraining chain with grab hook.
- Boom locking t-pin.

- Handle at end for easy extension.
- Fixed or swivel hooks available.
- Vertically pivoting boom to 6'-4" height.

### **Model EB - Fixed Length Fork Lift Booms**

Use the efficient, economical Fixed Length Boom attachment when telescoping is not required.

### **PRODUCT FEATURES:**

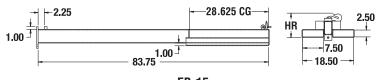

- Fixed length.
- Restraining chain with grab hook.

### EB-15 - Lightweight

- Accepts up to a 2" wide sling.
- Optional swivel hook available.

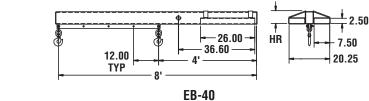

### EB-40 - Fixed Length

- 5 alternate hook positions.
- Fixed or swivel hooks available.

NOTE: All dimensions on drawings shown in inches unless stated.

## **Model EFB - Extended Fork Lift Boom**

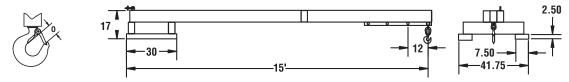

### Get the Extra Reach You Need with our Extended Fork Lift Boom

Use specifically for use with off-road fork trucks. This fork boom has four different hook positions on 12 inch increments from 12 to 15 feet. Low profile design is easy to store.

### **PRODUCT FEATURES:**

- 12' to 15' hook position.
- Extra wide fork pockets.
- Restraining chain with grab hook standard.

NOTE: All dimensions on drawings shown in inches unless stated.

### SPECIFICATIONS

Model	Maximu	m Capacity @	Hook Positio	on - (lbs.)	Hook Opening	Weight
Number	12'	13'	14'	15'	O (in.)	(lbs.)
EFB-25	2500	2300	2100	2000	1.00	665

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

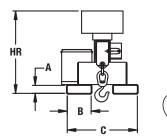

## **Precision Lifting Boom**

Quickly turns your fork lift into a portable crane.

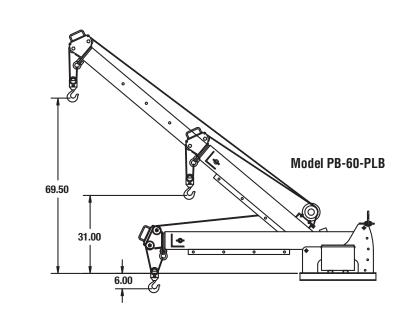

### **PRODUCT FEATURES:**

- Portable, compact and versatile lifting.
- Fits standard fork lift truck.
- Hook travels approximately 20'.
- Adjusts both horizontally and vertically.
- Restraining chain with grab hooks.
- Completely self contained 12Volt DC power supply.
- 100 AMP Hour Battery with charger.
- Easy to use toggle button control with standard 12' cord.
- Hoist hook speed averages 7.5 FPM.

**NOTE:** All dimensions on drawings shown in inches unless stated.

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

## Operation

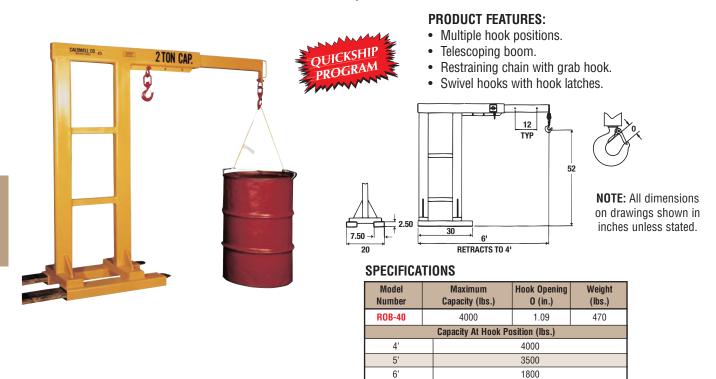

### **Real Time Tests**

Starting with a fully charged battery, the Precision lifting Boom lifts and lowers a 1,000-pound load from an eight-foot steel pit forty times. The battery charges in four to five hours with the supplied charger.

## **Model ROB - Reach Over Fork Lift Boom**

Use the Reach Over Boom when an extension boom is required and clearance is a factor.

## Model FCJ - Carriage Jib Fork Lift Boom

### **A**WARNING

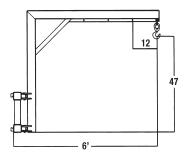

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

Use the Carriage Jib Boom attachment when fork obstruction is undesirable.

### **PRODUCT FEATURES:**

- Horizontally adjusting, 15° left or right of center, pivot boom.
- Designed for ITA Class II fork carriages.
- Multiple hook positions.
- Swivel hooks with hook latches.

**NOTE:** All dimensions on drawings shown in inches unless stated.

## **Drum Handling**

## **Drum Handling Slings**

### Versatile Drum Handling Sling

This sling allows for easy handling of various sizes of steel drums and barrels, and has a 1,000 lb. capacity. It is light in weight, high in strength, and is resistant to oil.

### **PRODUCT FEATURES:**

• Lightweight - weighs only 4 lbs.

Drum Hook Width (in.) 2-7/8

- Versatile lifts drums either vertically or horizontally.
- Self-tightening grip sliding drum hooks tighten grip on load as drum is lifted.
- Tough resistant to alkalis, ultra violet rays, rot and mildew.

SPECIFICATIO	NS
--------------	----

### Ratchet Type Drum Handling Sling

- Easily lift standing drums for transport.
- Tilt suspended drums to pour from open top or spigot.
- For use with ribbed steel drums, the ratcheting belly band tightens securely below the first rib.
- Standard wear pad for added protection.
- Ratchet tightens securely.
- Free end of ratchet strap sewn to stay properly threaded.
- Vertical legs sewn to belly band to maintain proper position.

## **Drum Handling**

## Model FDL - Fork Lift Drum Lifter/Rotator

The Caldwell Lifter/Rotator unit is designed for use with a lift truck in areas where an overhead hoist is not available. The drum is secured to the carrier above the level of the forks thus it may be used at the full height of the truck. With the chain wheel, the lift truck driver may rotate the drum from the cab of the truck (10' long drop chain). This unit will handle all standard 55 gallon metal drums.

NOTE: Dimensions shown in inches.

### **SPECIFICATIONS**

Model	Rated Cap	Weight	
Number	Full Drum	(lbs.)	
FDL-20-55	2000	1000	310

**NOTE:** The standard model FDL is for lifting drums containing free flowing liquids. Contact factory for drums containing other contents.

### **WARNING**

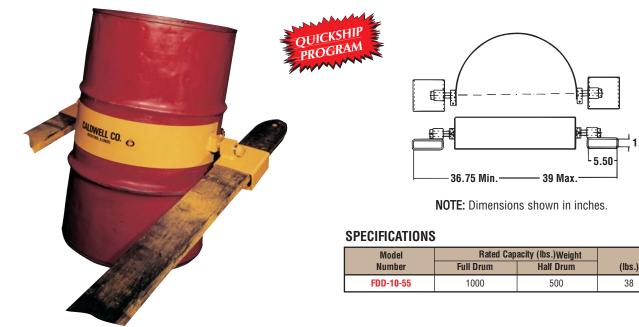

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

1 50

38

### Model FDD - Fork Lift Drum Lifter/Dumper

Designed to easily and economically lift, travel with, and dump drums into acceptable type containers. Pressure applied to the drum base against rim of container will tilt drum to preferred angle of emptying. Drum is secured to the lifter by a load binder. This unit will handle all standard 55 gallon metal drums.

## **Drum Handling**

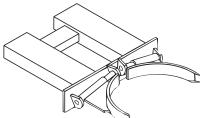

## **Model FG - Steel Drum Grippers**

Single Drum Gripper

### **PRODUCT FEATURES:**

- High quality heavy duty construction.
- Restraining chain with grab hooks.
- Handles drums of 55 or 30 gallon capacities.
- · Lift and release drums without leaving seat.
- Attaches to lift truck quickly and easily.
- Minimum maintenance required.
- Drums will not slip once clamped.
- Quick and easy drum release.

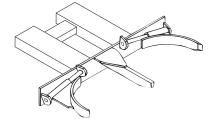

**Double Drum Gripper**

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

**SPECIFICATIONS** 

### **Model FE - Fork Extensions**

### **PRODUCT FEATURES:**

- Ideal for oversized loads.
- Easy installation onto existing forks.
- Fits standard fork thicknesses.
- Standard fork extension widths 4" through 7".
- Standard fork extension lengths 42" through 96".

- Extensions shall not exceed 1 1/2X the length of the existing forks.
- Extension capacities are reduced
- beyond existing fork tips (Approx. 60%).Do not tip-load the fork extensions.
- Load center of gravity must not extend
- past existing fork tips.
- Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

## RAMS & EXTENSION

### **Model FC - Fork Covers**

Caldwell Fork Covers are specifically designed to protect loads which cannot be marred or scratched. Made from durable nylon webbing, these covers are economical and long lasting.

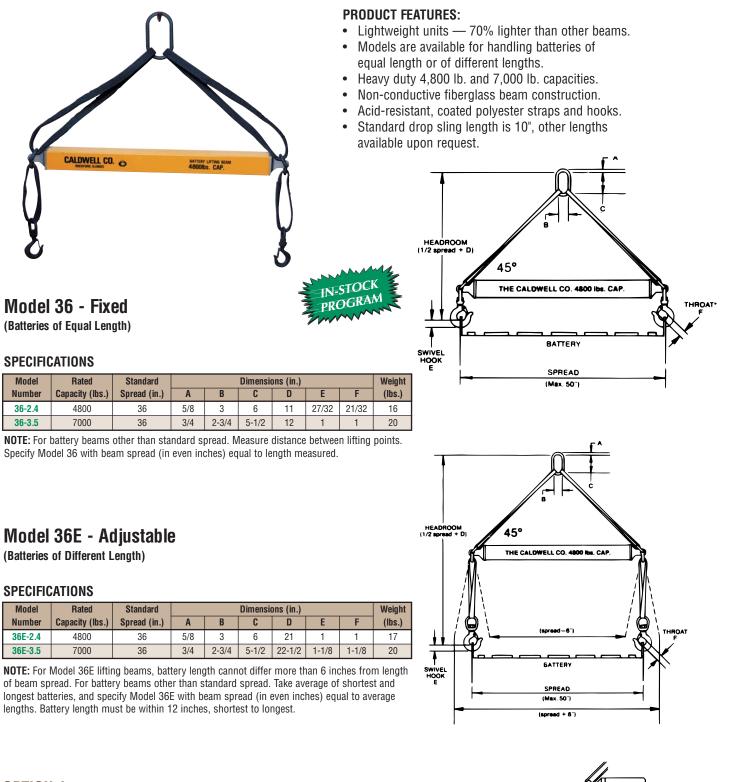

Model Number	Fork Cover Dimensions (in.)						
(Pair)	A B C						
42-1 1/2-4	42	1-1/2	4				
48-1 1/2-5	48	1-1/2	5				
48-2-6	48	2	6				
54-1 1/2-5	54	1-1/2	5				
84-4-6	84	4	6				

## **Battery Lifting Beams**

### Models 36 & 36E - Fiberglass Battery Lifting Beams

Used for applications that require a non-conductive beam such as lifting industrial fork lift truck batteries.

**OPTION J:** J-Hooks available in place of swivel hooks at a reduced cost.

**NOTE:** When ordering **J-Hook** option show Model 36 as 36J, and Model 36E as 36EJ.

## **Battery Lifting Beams**

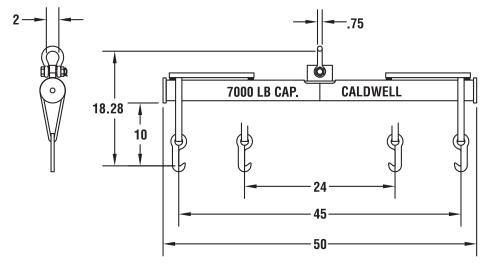

## **Models 36L - Low Headroom Battery Lifting Beam**

### **PRODUCT FEATURES:**

- Low headroom, 18.28".
- · Adjustable to handle batteries of different lengths.
- Non-conductive beam.
- Acid-resistant, coated polyester straps with either swivel or J-Hooks.

Shown with J-Hooks (Model 36LJ-3.5)

STANDARD Swivel Hooks

OPTION J J-Hooks Order Model 36LJ-3.5

### **Model SPTR - Trailer Spotter**

An inexpensive and fast way to move trailers with your fork lift truck. It quickly attaches to both forks for stable load movement with safety chain and grab hook for added security. Accepts standard 2" hitch inserts designed to handle 1-7/8" to 2-5/16" hitch ball for up to 6,000 pounds gross towing weight, and with the pintle adapter, up to 16,000 pounds gross towing weight.

### **PRODUCT FEATURES:**

- Easily move trailers with a fork lift truck.
- Restraining chain with grab hooks standard.
- Insert restraining pin standard.
- Can be used with most 2" standard inserts.
- Optional hitch insert or pintle adapter are available.

### Model HDTB - Heavy Duty Tow Bar

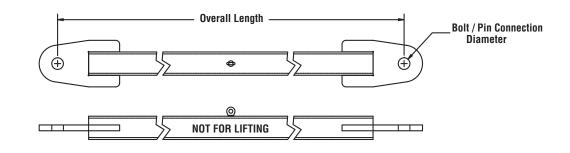

Pulling a heavy load? Caldwell's custom designed tow bar is the solution you need. Our tow bar is a solid connection which provides added control over standard tow chains when moving heavy equipment weighing in at 10, 20, 30 tons or more! Just provide the desired length, capacity, and connection required and we will deliver the solution you need.

### **PRODUCT FEATURES:**

- Can be used to push or pull a load.
- · Designed to accommodate your specific
- Custom designed per application.

## **Application Evaluation**

- 1. Maximum towing capacity (lbs.): \_\_\_\_\_
- 2. Overall length (distance between vehicles):
- 3. Connection type:
  - □ Pintle
  - □ Pin (please provide diameter and length):

Other (please specify): \_\_\_\_\_\_

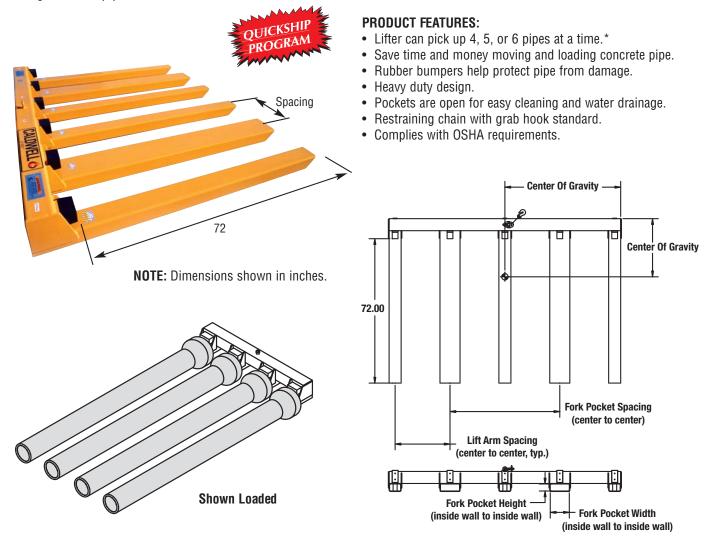

4. Other application information: \_\_\_\_\_

MFL-18-5	18	5	27	9.5 x 3.5	54	2000	10000	29.00	860
MFL-21-5	21	5	30	9.5 x 3.5	60	2300	11500	29.00	910

**NOTE:** Pipe lifter is designed for ASTM C76 bell and spigot pipes with A or B wall thickness. Other sizes are available, please consult factory.

Uther sizes are available, please consult factory.

Capacity/load information based off of model's center of gravity from bumper.

\* Quantity of lifting arms is the maximum number of pipes that can be handled in a single lift.

### **Model PP - Porta-Platform**

**NOTE:** Add option(s) to suffix of Model Number. Example: Option A - PP-1A \*Required in California

OPTION B Light bulb caddy

## A WARNING

Capacity of lift truck and attachment combination may be less than capacity shown on attachment. Consult lift truck manufacturer.

### **Model MPP - Pallet Puller**

### **PRODUCT FEATURES:**

- Used for moving hard to reach loaded pallets from flat surfaces, such as a truck or loading dock.
- Extends reaching capability of the fork lift truck.
- Single scissor action.
- Heavy duty steel design.
- Not for overhead lifting.
- Working load limit 1,250 pounds.
- 3/8" proof coil chain.

Model	Jaw Ope	ning (in.)	Chain	Weight

## Care & Use

Lif-Truc<sup>™</sup> Fork Lift Truck Attachments have been designed for specific tasks to withstand the particular forces imposed. Guidelines for installation, inspection, maintenance and repair, safe operation and operator training of these attachments follow:

#### INSTALLATION

Caldwell Fork Lift Truck Attachments shall be assembled and installed in accordance with the manufacturer's instructions, unless other specific arrangements have been approved in writing by manufacturer.

#### **OPERATOR TRAINING**

Fork lift attachments shall be operated in accordance with manufacturer's instruction manual, and by personnel who have received instructions described in the "Operating Practices" section of these guidelines. Training shall also include instruction regarding:

- 1. Details of the operating cycle.
- Application of the attachment to the load including (according to the manufacturer's instructions) adjustments to the attachment, if any, to adapt it to various sizes and kinds of loads.
- Instruction in any special operations or precautions that may be required.
- 4. Recognition of proper load configuration. For example, preferred operation requires an orderly pattern of stacking.
- Before assuming responsibility for using the attachment, an operator shall demonstrate his understanding of the lifting procedure to the instructor. The instructor should record notes of operator's demonstrated ability.

#### INSPECTION

The attachment should be visually inspected by or under the direction of an appointed person on a daily or weekly schedule depending on the nature of the attachment and the severity of the service. Details to look for include but are not limited to:

- 1. Structural deformation.
- 2. Cracks in the structural frame, welds, attachment points, mechanically operating parts, any attached slings, clevises and hooks.
- 3. Malfunctions during operation of a mechanically operating attachment.
- 4. Loose covers, fasteners and stops.
- 5. Faulty operation of automatic hold and release mechanisms.
- 6. Wear of lifting or attachment points, load supporting clevises, pins, slings, linkages and mechanical parts.
- 7. Missing nameplates and markings. Contact Caldwell for replacements.

#### **MAINTENANCE AND REPAIRS**

- 1. A preventive maintenance program should be established for each attachment by a qualified person based on recommendations made by its manufacturer.
- 2. Any repairs shall be done by the manufacturer or with instructions and guidance from the manufacturer. If repairs are performed by someone other than the manufacturer a qualified person should have responsibility for repairs. Dated records and details of repairs and parts replacement should be carefully maintained by a qualified person, and copies kept in your possession.
- 3. Replacement parts shall be at least equivalent to the original manufacturer's specifications.

### **OPERATING PRACTICES**

#### DO'S

- 1. The operator shall receive, read and understand the manufacturer's instruction manual.
- 2. The operator shall watch carefully that the attachment is performing properly during the lifting procedure.
- 3. The operator shall know the standard crane hand signals.
- 4. The operator shall only respond to signals from an appointed person. However, stop signals from anyone shall be obeyed.
- 5. The operator shall notify a designated person when he considers a load to be unsafe.
- 6. The operator shall inspect the attachments before using. Any defect found shall be examined by a qualified person to determine if it is a hazard.

#### DON'TS

- 1. The operator shall not operate a malfunctioning attachment or one with an "out of service" tag attached.
- 2. The operator shall not use the attachments for any purpose(s) other than those designated by the manufacturer's instruction manual.
- 3. The operator shall not use an attachment when the capacity, weight or safety markings are missing or are not legible.
- 4. No one shall make alterations or modifications to attachments without consulting the manufacturer.
- 5. No one shall obscure or paint over the manufacturer's capacity, weight, or safety markings.
- Loads shall not be lifted higher than necessary or be left suspended unattended.
- 7. The attachment shall not lift a load that is not properly balanced for safe lifting.

#### HANDLING THE LOAD

- 1. The attachment shall not be loaded in excess of its rated load.
- 2. Ensure the load can withstand forces applied by the lifter.
- The combined weight of the attachment and load shall not exceed the rated load of the fork lift when load center and lost load is considered. (See fork lift manufacturer's information).
- 4. The attachment shall be applied to the load in accordance with the manufacturer's recommended operating procedure.
- Attachment chains shall not be kinked, and multiple part lines shall not be twisted about each other.
- 6. The attachment shall not touch obstructions during load movement.
- The attachment shall not be loaded with loose material that might fall during movement.
- 8. The operator or other personnel shall not place themselves or any part of their bodies beneath suspended loads.
- 9. The load or attachment shall not be slid on the floor or other surface.
- 10. The attachment shall not be used for loads for which it is not designed.
- 11. Do not attempt to reposition load when raised.
- 12. A preliminary lift of a few inches shall be made to establish that the load is stable.
- 13. All loads shall be accelerated and decelerated smoothly and slowly. This applies to both mast movement and fork lift movement.

Modifications or repairs performed on your lifting equipment without prior written approval from The Caldwell Group, Inc. voids your warranty. Refer to ASME standards for information regarding the liability of repaired or modified lifters.
