Stay safe. This extremely powerful On/Off Permanent Rare Earth magnet lets you guide loads into position without being in close proximity. Attach On/Off permanent magnet to a corner or along the side of your load.

As the load is lifted, the Load Control Magnet's articulating connection to the lightweight telescoping pole allows you to control and position the load exactly where you want without endangering yourself, others or expensive equipment, should your lifting device fail.

Features

- Powerful On/Off Rare Earth Magnet
- Works on Flat and Pipe
- Pole telescopes from 6' to 12'

THE ANSWER TO YOUR “HANDS-OFF” POLICY

It's Simple...

"Stiffy Safe Hand Tools - we protect fingers, hands & arms, by avoiding pinch points & crush points"

Purpose

To manufacture a line of safety products that provide rig operators a meaningful way to create safer working conditions and implement evolving risk management safety protocols.

When used effectively & as designed, our products provide a buffer zone of safety where rig personnel can guide, maneuver, spot and land suspended loads & work drill pipe on the platform.

Operators now have a way to mitigate risk by equipping & training workers to not place themselves in danger working in an unsafe proximity to, or under hazardous suspended loads.

Applications

Drilling platforms: offshore and onshore, loading and unloading OTR trucks
“Hands Free” Guiding, spotting and landing suspended loads
Maneuvering drill pipe and all types of tubular on pipe racks or on the platform
Snagging taglines and sling legs

Ratings

Load testing: Static Pull = 400 lbs. / Compression = 600 lbs.
Our tools are not lifting / load bearing tools, SWL cert not required.
Major components tested to ASTM standards,
Country of origin: USA

Instructions for use

Always wear proper personal protective equipment as the job requires
Inspect the tool before each use and use both hands when operating tool
Stand with both feet firmly planted on the ground and use only in straight push /pull applications
Inspect and clean tool after each use and store in clean, dry environment

Warnings

Do not use the tool if damaged, Do not use the tool as a pry bar
Do not use tool while tired or under the influence of drugs, alcohol, or medication
Do not over reach

Inspection and maintenance

Inspect the tool before each use
Inspect all components of the tools for damage and wear clean tool after each use and store in clean, dry environment If tool has been damaged: report - remove - replace

**We received this comment from an operator
about the STIFFY HAND TOOL**

*“I observed the crane crew offloading a boat load of 9.625 casing.
During this operation only having one SHT, the man using it
spotted every load on his end without help. The push – pull
features of The STIFFY HAND TOOL made a big difference.”*

Stiffy Hand Tool

Patent Pending

HSE Bulletin

"Stiffy Hand Safety Tool" – Hands-off Tool to spot Objects and Loads

In 2011, injuries to arms, hands, and fingers accounted for 26% of the total incidents submitted in the Gulf of Mexico. Variable deck loads can thoroughly cover the main deck area with tubular, cutting boxes, tote tanks, etc. This equipment is continually being transferred which creates hazardous risks (pinch points) when spotting. The limited deck space means that Roustabouts have used their hands, fingers, and bodies in at-risk-positions to spot or remove loads.

New to our industry is a hands-off tool called the "*Stiffy*", a fiberglass push pole. Hercules 173 has field tested the "*Stiffy*" for six months with significant success in eliminating hand and fingers injuries when transferring loads. This tool uses opposing grab hooks to grasp taglines and slings.

Before placing hands on loads that are moving or have the potential to move, always stop and consider if an alternative method is available. Using the Hercules Power Tools, particularly the Job Safety Analysis process, pinching and caught-between hazards can be mitigated by use of proper planning, sound lifting procedures, taglines, signaling, and the "*Stiffy Hand Tool*" as an alternative method of final spotting assistance.

We recommend that each Hercules rig carry and use these hands-off tools for main deck usage as well as on work vessels. Ordering information is shown below.

Tool, Stiffy Hand, Reach Extender, Fiberglass Handle, 42 Inch
SHT2-42"

Tool, Stiffy Hand, Reach Extender, Fiberglass Handle, 50 Inch
SHT2-50"

Tool, Stiffy Hand, Reach Extender, Fiberglass Handle, 72 Inch
SHT2-72"

Check Out some new tools our R&D team

The Pipe Wipe is used primarily on land rigs to clean the tubular as it is pulled up. It comes in 3, 4, 5 inch diameters

STIFFY "Handy Hook"™

The Handy Hook is the ultimate in Personal Protection Equipment.

The Handy Hook is a great way to enable personnel to save fingers, hands & arms by avoiding pinch points and crush points.

SHT3-72	TYPE 3 - 72" HAND TOOL, (NO D HANDLE)

(Type 2 tool head (fixed) with other end tapped , w/ center alum handle)

THE STIFFY SNARE TOOL™

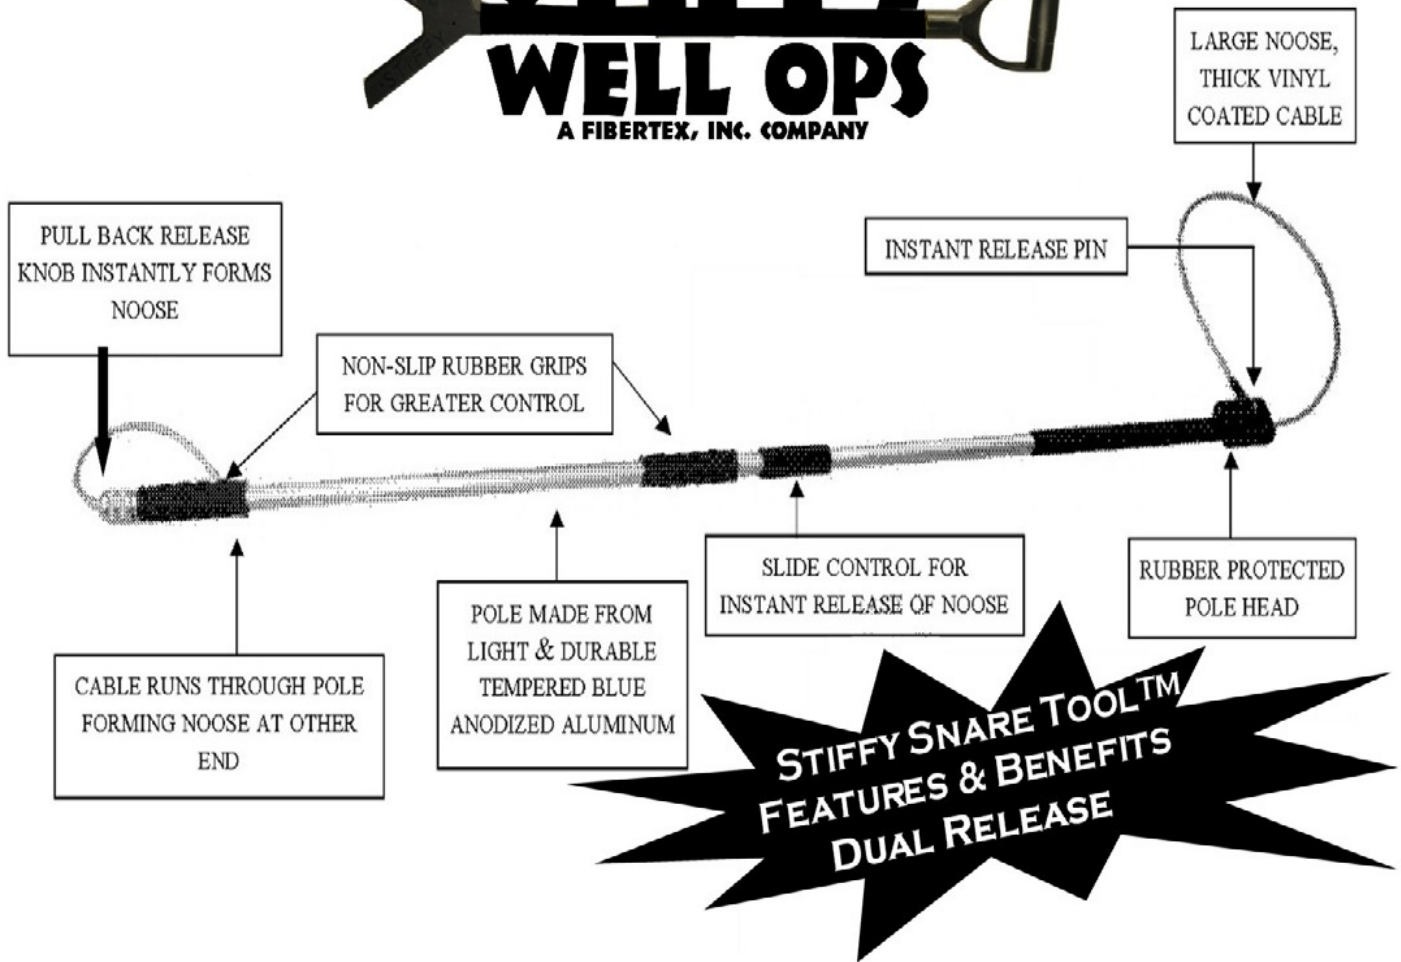

Aluminum and Stainless Steel Snare Poles

Cousin to the wildly popular **STIFFY HAND TOOL**, the **STIFFY SNARE TOOL** continues to set the bar in assisting operators in providing safe working environments & risk mitigation. After 2 years of extensive R&D, STIFFY has brought to the market the first new SNARE TOOL designed for controlling tubular in WELL-OPS. The **STIFFY SNARE TOOL** features improved non-slip grips, automatic locking mechanism and super strong aluminum or stainless steel shaft. The Dual Release uses a spring loaded noose release to extend the cable through the tool to release the tubular or the slide control which instantly drops the noose from the tool.
